

ONE CROWD. EVERY ANGLE. ONE PERSONAL FILM.

CrowdCut turns the phones already recording into a live camera network, then gives every fan a synchronized memory no single phone could capture.

WHY NOW

WHO GETS VALUE

WHY THIS MATTERS

FANS

A BETTER MEMORY

Record once, see your angle go live, and keep a multi-angle artifact centered on where you stood.

ARTISTS

AUTHENTIC CROWD MEDIA

Turn fan perspectives into the live program, artist-approved recap footage, and shareable moments.

FESTIVALS

VISUAL TRUTH, RIGHT NOW

See the front, back, and different stages as they actually look - not only attendance numbers or a heatmap.

APPLICATIONS

WHAT CROWDCUT UNLOCKS

01

LIVE STAGE WINDOWS

Choose where to go by viewing real crowd video from each stage in the festival app.

02

CROWD-DIRECTED SHOW

Blend front, side, wide, and reaction angles while the performance is happening.

03

PERSONAL BURST

Preserve T-3 to T+3 across available views, then replay or download the synchronized moment.

04

REMOTE FAN PRESENCE

Let livestream viewers step into authentic crowd perspectives fixed cameras cannot provide.

CONVEX IS THE PRODUCTION CONTROL ROOM

LiveKit carries the video. Convex makes every device agree on what the production is doing.

01 LIVE PRESENCE

Who joined, who is recording, and which angles are usable.

02 SCENE REVISIONS

Which 1-5 cameras are live and what every screen should show.

03 BURST CUE

Who captures the same instant and the exact T-3 to T+3 window.

04 READY + OWNED

Which synchronized views each fan can replay and keep.

THE PATH FROM WORKING DEMO TO FESTIVAL PLATFORM

Build on the same realtime core - expand reliability, rights, and distribution.

NOW - WORKING SYSTEM

PROVE THE EXPERIENCE

- QR join, live camera wall, 1-5 angle direction, and personal Bursts.
- Realtime join, cut, cue, readiness, ownership, and reconnect through Convex.

NEXT - FESTIVAL PILOT

PROVE IT IN THE FIELD

- Official stage rooms, app deep links, adaptive quality, offline queues, and rights controls.
- Validate 25-100+ phones, under 250 ms control state, and over 95% artifact completion.

THEN - FESTIVAL PLATFORM

EXPAND THE MEDIUM

- Across-stage live windows, artist-triggered moments, official livestream crowd POVs.
- Automated personal edits, schedule context, sponsor activations, and year-round artist use.
