

THE CROWD BECOMES THE CAMERA NETWORK.

Turn the phones already in the audience into a live production - then give every fan a personal film.

ROADMAP

01 FESTIVAL-READY SCALE

- + Stage-scoped rooms and official-app deep links.
- + Adaptive uplink plus offline Burst queues for congested festival networks.
- + 25-100+ device load validation and automatic video quality tiers.
- + Venue moderation, artist rights, consent, and content lifecycle controls.

02 FAN + ARTIST PRODUCT

- + Artist-triggered hero moments and official synchronized Burst cues.
- + Personal 'where I stood' edits and collectible set memories.
- + Live Cuts across stages: see what it actually looks like right now.
- + Artist-approved fan footage pools for recap and social teams.

03 INTEGRATIONS + GTM

- + Outside Lands app placement with ticket-linked identity and permissions.
- + JamBase schedule, set, stage, and artist context.
- + Official livestream integration: crowd perspectives beside the broadcast.
- + Sponsor moments that reward real contribution instead of screen time.

COMPOUNDING FLYWHEEL

MORE LIVE ANGLES → BETTER SHARED FILM → BETTER PERSONAL CUTS → MORE SHARING → MORE CONTRIBUTORS

WHY CONVEX REMAINS THE CORE

Convex remains the source of truth for presence, scene revisions, synchronized capture membership, readiness, lifecycle, idempotency, and ownership - while the media and rendering providers can evolve independently.

REMOVE CONVEX AND THE CROWD STOPS BEHAVING LIKE ONE PRODUCTION.
